

Wooden Reality

John Xin

"Rediscover yourself
in the wooden mirror"

""

Hand-built with 240 servo-controlled wooden tiles, this wooden mirror reflects your faces in a warm and lively way.

It is designed to have just enough tiles to display a recognizable face, but blurs out details that separate one from one another to highlight what we all are: **a human with soul**.

Inspired by Prof. Daniel Rozin and a client with cerebral paralysis.
